

# GRAVITY -- THE SUMP

## HOW AND WHY GRAVITY EXISTS

By Mike Pavledis © copyright 2007

Based on the premise that “space is an energy field”, the above model shows “*QES*” to be a pyramid that represents a Quantum Energy/Space, a point of Ultimate Vacuum. The four red lines within it denote the energy field’s points-of-linkage with other such quanta to form the matrix of All Space. (Re: ET – [www.h-core.org](http://www.h-core.org)).

When a large enough volume of Low-density space is captured within a High it will collapse toward a central point. This pressure-induced mechanism creates a sphere of wedges that jam around a central point so creating a new environment. This sphere’s outer surface acts as an energy ‘SUMP’—effectively -- GRAVITY.

As G magnitude increases with additional spheres, the structure *becomes a Gravity driven self-propagating system and continues to independently grow.*

The first most important event in the development of the Universe can be seen to be the formation of the *SUMP -- THE BIRTH OF GRAVITY.*
