

SPACE

THE EXISTENT.

Quantum energy/space is an absolute minimum charge of energy that occupies a single point of space. Such a point is an almost perfect vacuum and is shown in the sketch below by the four red lines that connect the centre point of a pyramid to its four points that are indestructibly connected (in continuum) to similar surrounding pyramidal vacuums. ***They have successfully avoided total collapse to nought thus eliminating zero from reality.*** This foam like structure that expands and contracts subject to external pressures can be seen as the matrix of space and is --

THE FUDAMENT OF REALITY.
